

Do you have Psoriasis?

If so, you may qualify to participate in a clinical research study of an investigational medication.

Criteria needed to be entered into study:

Must be 18 years of age or older

Must have stable, chronic plaque psoriasis

Must be in good health

Type of investigational agent being tested: injectable

Study specifics: approximately 52 weeks with approximately 8 clinical visits

Study participants may receive study medication, study related laboratory tests, and compensation for their time and travel.
